Office Action Summary	Application No. 10/672,614	Applicant(s) BOWEN, BRIAN D.	
	Examiner James R. Bidwell	Art Unit 3651	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Frost Incorporated "Heavy-Duty Roller Turn Rollers and Bolts" brochure in view of Specht (U.S. Patent 3,915,275).

The Frost brochure shows a roller turn roller having an axle tube, a pair of roller bearings, a roller shell, spaced retainers and a bolt that extends through the axle tube to mount the roller between not shown mounting bars. The axle tube is not shown as being a one piece continuous tube. However, shown by Specht in Figure 7 is a one piece continuous axle tube 55. To have such on the Frost Brochure would have been obvious to one of ordinary skill in the art as it would reduce the number of parts on the roller.

Re claim 2, the drawing of the roller shows the ends of the tube as extending out beyond the retainers.

Re claim 3, the shell is shown with a shoulder that engages the bearings and the bearings also engage the retainers.

Re claim 6, the retainers are axially spaced and secured to the axle tube.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Frost Brochure in view of Specht as applied to claims 1-3 and 6 above, and further in view of Hooper et al. (U.S. Patent 4,344,218).

The combination of the Frost brochure and Specht does not specifically disclose threaded retainers. However, shown by Hooper et al. are threaded retainers 19. To include such onto the modified Frost reference would have been obvious to one of ordinary skill in the art as threaded retainers might stay more secure.

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James R. Bidwell whose telephone number is (571)272-6910. The examiner can normally be reached on Tues.-Thur. from 6:30 to 4:00. The examiner can also be reached on alternate Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene O. Crawford, can be reached on 571-272-6910. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
